Lab#13:Create a HTML form that accepts the student data like enrollment number, name, email id, password, confirm password, phone number, address, gender, choices of branch and perform client-side validation using JavaScript.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>Student Registration Form</title>
  <style>
    body {
      font-family: Arial;
      background: #f4f4f4;
    }
    .container {
      width: 400px;
      margin: auto;
      background: #fff;
      padding: 20px;
      border-radius: 10px;
    }
    input, select, textarea {
```

```
        width: 100%;
        padding: 8px;
        margin: 5px 0 15px;
      }
      .error {
        color: red;
        font-size: 14px;
      }
      button {
        background: green;
        color: white;
        padding: 10px;
