Lab#2 : Design Form of Student Registration and Employee registration with different fields.

Part 1 (*Employee registration form*) :

Employee registration form using html and css:

Aim : to design an employee registration form using ***html*** and ***css*** that collects user details through various input elements, and adding validation for required fields.

Source Code :

1. ***employee_registration_form.html*** **:**

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Employee Registration Form</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>
  <h1>Employee Registration Form</h1>
  <form action="#" method="post">
    <table>
      <tr>
        <td><label for="firstName">First Name:</label><br><input type="text"
id="firstName" name="firstName" required></td>
        <td><label for="lastName">Last Name:</label><br><input type="text"
id="lastName" name="lastName" required></td>
      </tr>
      <tr>
        <td><label for="gender">Gender:</label>
          <input type="radio" id="male" name="gender" value="male" required><label
for="male">Male</label>
```

```
 <input type="radio" id="female" name="gender" value="female"><label
for="female">Female</label>
        <input type="radio" id="other" name="gender" value="other"><label
for="other">Other</label></td>
            <td><label for="email">Email:</label><br><input type="email" id="email"
name="email" required></td>
        </tr>
        <tr>
            <td><label for="phone">Phone Number:</label><br><input type="tel"
id="phone" name="phone" pattern="[0-9]{10}" required></td>
            <td><label for="dob">Date of Birth:</label><br><input type="date" id="dob"
name="dob" required></td>
        </tr>
        <tr>
            <td><label for="city">City:</label><br><input type="text" id="city" name="city"
required></td>
            <td><label for="address">Address:</label><br><textarea id="address"
name="address" rows="4" cols="25" required></textarea></td>
        </tr>
        <tr>
            <td><label for="department">Department:</label><br>
                <select id="department" name="department" required>
                    <option value="">Select a department</option>
                    <option value="hr">Human Resources</option>
                    <option value="it">Information Technology</option>
                    <option value="finance">Finance</option>
                    <option value="marketing">Marketing</option>
                </select></td>
            <td><label for="position">Position:</label><br><input type="text" id="position"
name="position" required></td>
        </tr>

      </table>
      <br><input type="submit" value="Register">
   </form>
</body>
</html>
```

Style.css :

```
body {
   font-family: Arial, sans-serif;
   margin: 20px;
}

h1 {
   text-align: center;
}

form {
   padding: 20px;
   border: 1px solid #ccc;
   border-radius: 5px;
   background-color: #f9f9f9;
}

table {
   width: 100%;
   border-collapse: collapse;
}

td {
   padding: 20px 30px;
}

label {
   display: block;
   margin-bottom: 5px;
}

input[type="text"],
input[type="email"],
input[type="tel"],
input[type="date"],
textarea,
```

```
select {
   width: 100%;
   padding: 8px;
   margin-bottom: 15px;
   border: 1px solid #ccc;
   border-radius: 3px;
}

input[type="radio"] {
   margin-right: 5px;
}

input[type="submit"] {
   width: 100%;
   padding: 10px;
   background-color: #4CAF50;
   color: white;
   border: none;
   border-radius: 3px;
   cursor: pointer;
}

input[type="submit"]:hover {
   background-color: #45a049;
}
```

Output :

FIG 1 : Employee registration form output

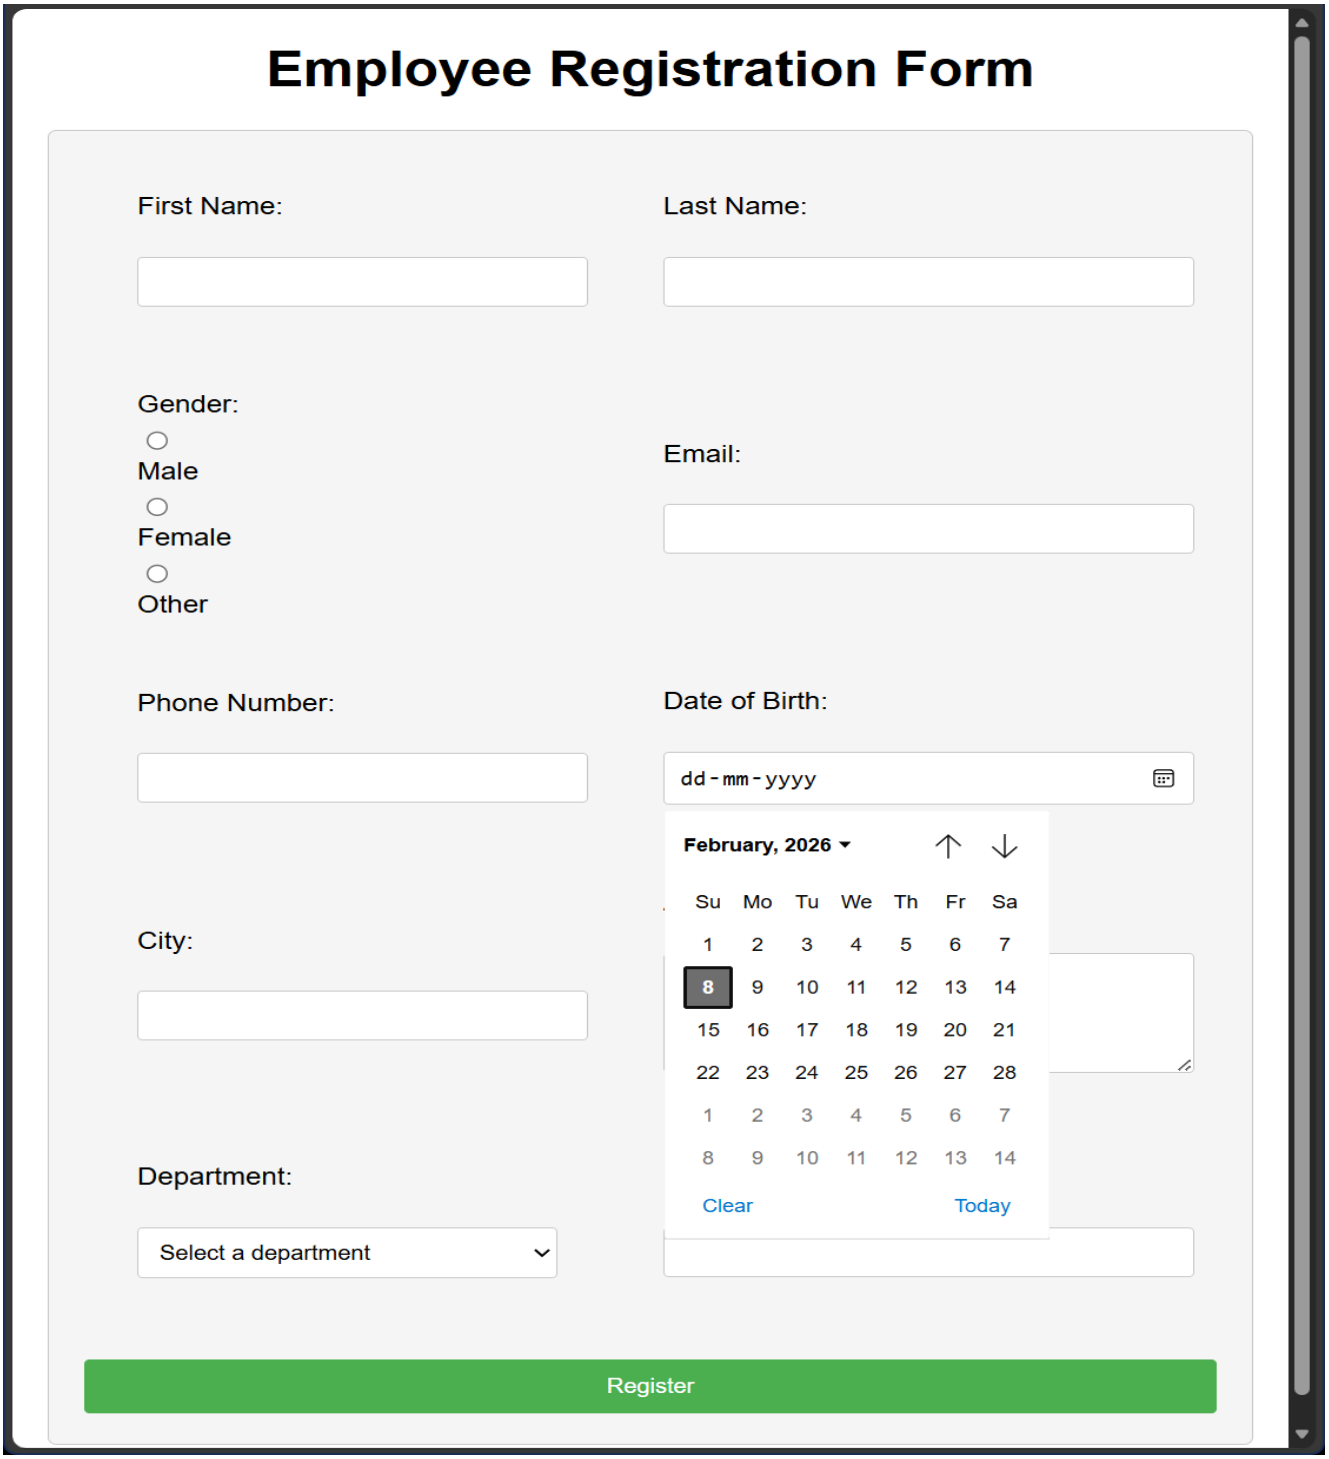

Fig 2 :

Filled employee registration form

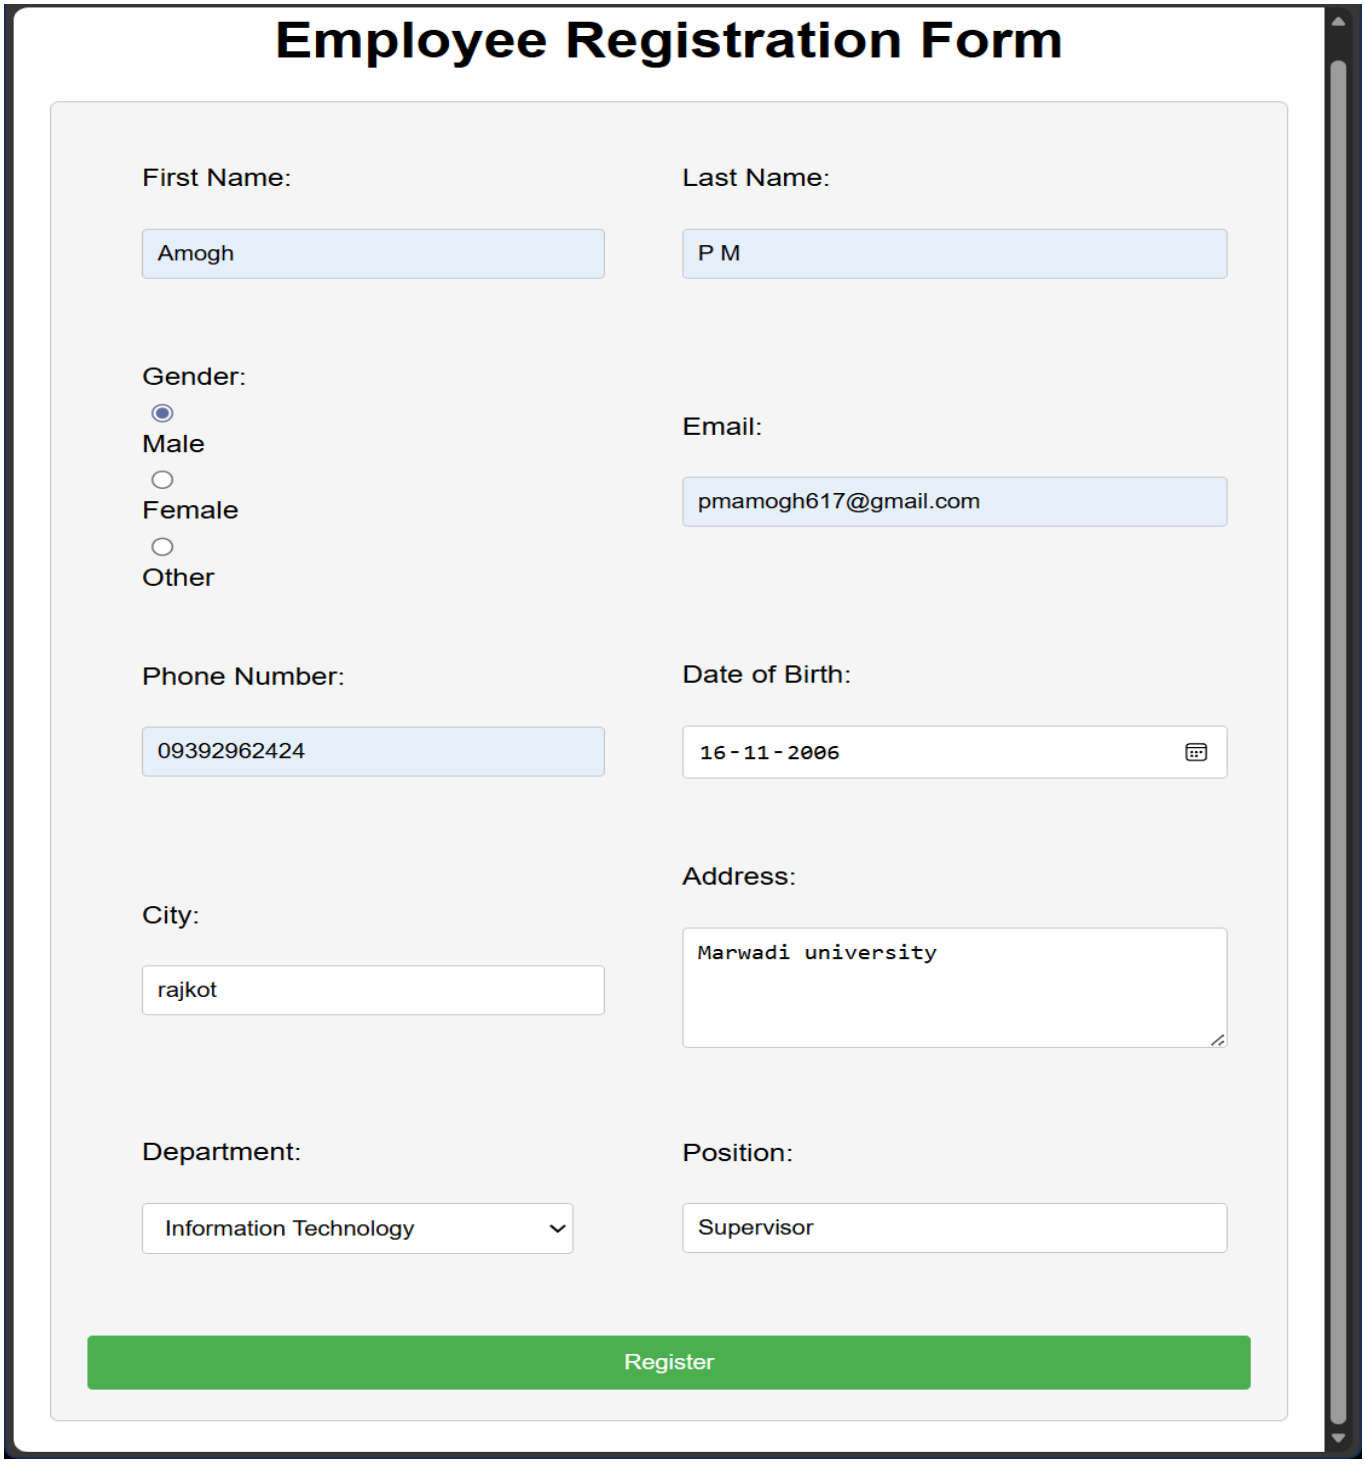

Fig 3 :
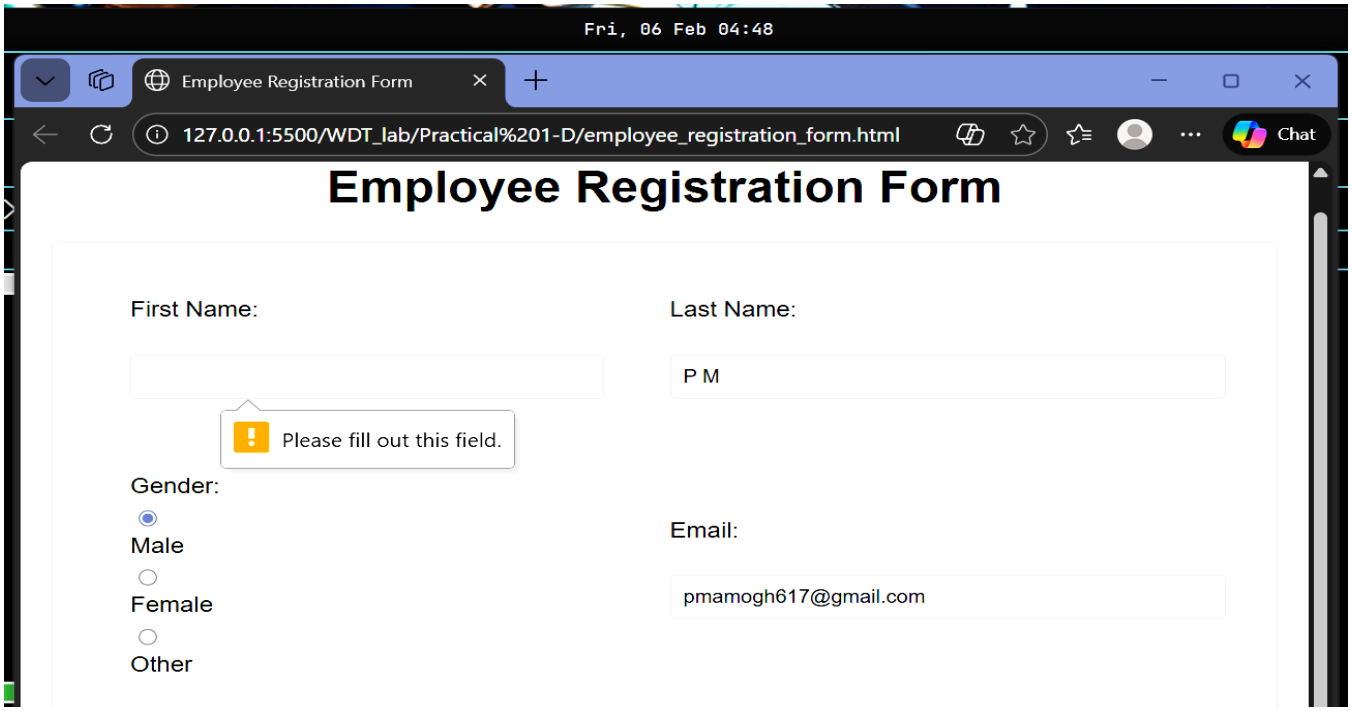
Added Validation



Part 2 (*Student Registration Form*) :

Student registration form using html and css:

Aim : to design an employee registration form using ***html*** and ***css*** that collects user details through various input elements, and adding validation for required fields.

Source Code :

1. ***Student_registration_form.html:***

```
<!DOCTYPE html>
<html lang="en">
<head>
   <meta charset="UTF-8">
   <meta name="viewport" content="width=device-width, initial-scale=1.0">
   <title>Student Registration form</title>
